

Electronic Sensors & Tools

Compact Microscopes for use in electronics component/pcb inspection & for inspection of gems & precious stones (60x to 200x)

Compact weighing scale- 200 gram capacity with other weight measure options such as ounce measure, selectable with ease

Sensors – Smoke, Heat, Gas and PIR Movement detectors

AC-DC Voltage & Current reading precision Clamp Meters

Temperature-Controlled soldering stations for precision soldering

Anti-static Mats for soldering stations with wrist straps as required

Anemometers – Wind Speed indicators hand-held and remote cable monitoring type

Mini High Speed Drilling-cum-Milling Machines for PCBs and for Jewel Designers/Manufacturers
